

**WARNING!!****PLEASE READ!!****WARNING!!****PLEASE READ!!**

1. This device is intended to serve as an aid. Improper use of the BoatLoop can cause injury or lead to death.
2. Do Not use as a permanent mooring line. **DO NOT USE AS A PRYING BAR** for fiberglass poles will break.
3. It is estimated that most users have a Pull or Push strength from 50 to 250 pounds. **DO NOT EXCEED 100 POUNDS OF PULLING AND 75 POUNDS OF PUSHING** as damage to this product OR **INJURY to the User** could result.
4. **Use Additional Caution** when extending the Fiberglass pole while using to Push away. Fiberglass poles are light weight and when extended it is more susceptible to buckling which may lead to cracking or breaking of the pole. Lighter loads should be applied when the pole is fully extended. (Buckling means the bending or breaking of the pole with heavier Pushing)
5. The BoatLoop will **FLOAT ONLY** if the Extension Pole is extended twelve ( 12 “) or more inches .

**USES**

While on your boat or around the dock, do your extended reaching and pulling with the BoatLoop. The Loop or the Hook can capture most anything around the dock.

Use the Loop or Hook to reach things in the water or around the dock.

Use the Push-Off Stub as a push-away device when too close.

The BoatLoop's Line Handling Hook can be used to hand a line or hang a line.

The Large Loop can be used to assist or aid someone distressed in the water.

Carry it with you when stepping off the boat. The wind or current may move your boat unexpectedly.

Avoid risk of damaging your boat by getting too close to attach a line. "Get BoatLoop Close" and control your movement to the dock.

Get BoatLooped.... it's the safe way to extend your reaching and pulling around the boat or dock.

**HOW TO PROPERLY USE theBoatLoop**

The Boatloop Extension Pole can be locked by using one or both of the following methods.

1. **Ensure That the Loop Head is Tight Before Using.** Loss of the Loop head could result if left loose.
2. In any position of the Extension Pole, hold Twist Grip 1 and Twist Grip 2 and Twist in opposite direction as shown below until it "CLICKS". Twist Hard, it will "CLICK". This will lock the Extension Pole. Opposite twist will Unlock the extension Pole.
3. Twisting the Compression Nut on the Base Pole will also Lock the Extension Pole.
4. After desired pole length is tight/locked, place the Loop over the bollard, post or cleat and pull from the Handling pole.
5. The Loop/Head can be removed from the pole for storage if desired by gripping the Large Hook and Twist Grip 1 and twisting opposite direction to unscrew the head.
